 - b. at least two partially reducible metal oxides chosen from the oxides of cerium, molybdenum, tungsten, vanadium, tin and chromium;
 - c. zirconium oxide
 - d. lanthanum oxide and
 - e. aluminum oxidewherein the Group VIII metal comprises nickel, platinum, palladium, rhodium or mixtures thereof. at a temperature in the range of 600 - 900 °C wherein the sulfur content of the hydrocarbon feedstock is at least 1 ppm.
2. A steam reforming process according to claim 1 wherein the sulfur-containing hydrocarbon feedstock is natural gas, liquefied petroleum gas, naphtha, gasoline, kerosene, jet fuel, diesel, or methane.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a steam reforming catalyst, classified in class 502, subclass 325+.
 - II. Claim 2, drawn to a steam reforming process using a catalyst, classified in class 252, subclass 373+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product, such as in the purification of automotive exhaust gases of an internal combustion engine.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, etc. and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1754

4. A telephone call was made to **Mr. Bhat** on **January 19, 2005** to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Primary Examiner, Cam N Nguyen, whose telephone number is 571-272-1357. The examiner can normally be reached on M, W, R, & F, 8:45 AM - 5:15 PM. *571-272-1357*
